Veteran-Owned | Fayetteville, North Carolina | (910) 229-9087 | donaldglover.tree@gmail.com

Service Area & Equipment

Primary service area: Fayetteville and Cumberland County; surrounding communities by project review. Confirmed equipment: 2026 John Deere Z530R 54-inch mower; 6 × 12 utility trailer; STIHL BR 350 backpack blower; STIHL FS 56 R trimmer. The MS 251 chain saw is excluded pending purchase verification.

Important Scope Notice

This catalog retains the 40 original service names and descriptions. All services are subject to site assessment, safe access, appropriate equipment, qualified personnel, insurance, applicable permissions, and an approved written scope. Specialized services may not be currently available and must be separately confirmed.

Service Offerings

1. Tree Removal

Professional tree removal services, including tree assessment, cutting, sectional dismantling when necessary, and removal of tree debris as outlined in the approved project scope.

2. Tree Trimming & Pruning

Professional tree trimming and pruning to remove dead, damaged, or overgrown branches, improve tree health, maintain proper clearance, and enhance property appearance.

3. Stump Grinding & Removal

Grinding and removal of unwanted tree stumps to reduce surface hazards, improve property appearance, and prepare the area for future landscaping or use.

4. Storm Damage Cleanup

Removal and cleanup of fallen trees, broken limbs, and storm-damaged vegetation. Includes debris handling and hauling as specified in the approved scope of work.

5. Land Clearing

Clearing designated areas of trees, brush, small vegetation, and other unwanted growth to prepare property for construction, landscaping, access, or other intended uses.

6. Brush & Debris Removal

Collection, loading, hauling, and disposal of brush, branches, limbs, and other approved yard debris.

7. Tree Assessment & Inspection

Visual assessment of trees to identify apparent structural concerns, dead or damaged limbs, potential hazards, and recommended maintenance or removal services. This is not a certified arborist report.

8. Lawn Care & Maintenance

Professional lawn care and maintenance services, including grass mowing, edging, trimming around trees and landscaping, weed control through mechanical removal, lawn cleanup, and general property maintenance. Services are customized to meet customer needs and property requirements.

9. Equipment, Mobilization & Disposal Fees

Charges associated with mobilizing personnel, vehicles, trailers, and specialized equipment to the job site. May include equipment transportation, loading and hauling of tree debris, brush removal, disposal facility fees, equipment usage, and related operational expenses. Fees are determined by project requirements, travel distance, equipment needs, material volume, and applicable disposal costs.

10. Emergency Storm Response

Emergency tree and property cleanup services following severe weather events, including removal of fallen trees, broken limbs, hazardous branches, and storm-related debris. Services may include tree cutting, sectional dismantling, debris loading, hauling, and disposal. Pricing is based on site conditions, equipment requirements, accessibility, and project scope.

11. Seasonal Yard Cleanup & Leaf Removal

Seasonal property cleanup services, including leaf collection and removal, fallen branches, yard debris cleanup, brush removal, and general outdoor property maintenance. Services are customized based on property size, accumulated debris, labor requirements, hauling, and disposal needs.

12. Mulching & Landscape Bed Maintenance

Professional landscape bed maintenance services, including mulch installation, mulch replenishment, bed edging, removal of leaves and debris, weed removal, and general cleanup of landscaped areas. Services are customized according to property size, material requirements, labor, and project scope.

13. Brush Hogging & Field Mowing

Brush hogging and field mowing services for overgrown fields, vacant lots, large properties, and undeveloped land. Services include cutting tall grass, weeds, light brush, and unwanted vegetation to improve property accessibility, appearance, and maintenance. Pricing is based on acreage, vegetation density, terrain, accessibility, and equipment requirements.

14. Weed Trimming & Property Maintenance

Professional weed trimming and property maintenance services, including trimming around trees, fences, buildings, driveways, walkways, and landscape beds. Services include cutting overgrown vegetation, maintaining property edges, and general outdoor cleanup to improve property appearance and accessibility. Pricing is based on property size, vegetation conditions, labor, and equipment requirements.

15. Lawn Mowing & Edging

Professional lawn mowing and edging services, including grass cutting, trimming along sidewalks, driveways, walkways, fences, and landscape borders. Services are designed to maintain a clean, neat, and well-maintained property. Pricing is based on lawn size, grass conditions, frequency of service, and property accessibility.

16. Lot Preparation & Site Cleanup

Property and lot preparation services, including removal of unwanted brush, small trees, vegetation, fallen limbs, and accumulated debris. Services may include site clearing, vegetation management, debris loading, hauling, and general cleanup to prepare properties for landscaping, construction, access, or future development. Pricing is based on lot size, site conditions, vegetation density, equipment requirements, and project scope.

17. Driveway & Access Road Clearing

Professional driveway and access road clearing services, including removal of overgrown brush, small trees, vegetation, fallen limbs, and other obstructions. Services may include vegetation trimming, debris removal, hauling, and clearing designated access areas to improve property accessibility and visibility. Pricing is based on project length, terrain, vegetation density, equipment requirements, and site conditions.

18. Fence Line Clearing & Maintenance

Fence line clearing and maintenance services, including removal of overgrown brush, weeds, vines, small trees, and unwanted vegetation along designated fence lines. Services may include trimming, vegetation control, debris removal, and hauling to improve fence accessibility, visibility, and property appearance. Pricing is based on fence line length, vegetation density, terrain, accessibility, and equipment requirements.

19. Debris Hauling & Disposal

Professional debris hauling and disposal services, including collection, loading, transportation, and disposal of tree limbs, branches, brush, logs, yard waste, and other approved materials. Disposal is conducted at authorized facilities in accordance with applicable requirements. Pricing is based on debris volume, weight, transportation distance, labor, and facility disposal fees.

20. Hazardous Limb Removal & Tree Risk Evaluation

Tree maintenance services involving the removal of dead, broken, damaged, or hazardous limbs that may pose a risk to nearby structures, vehicles, walkways, or property. Services may include visual observation of apparent tree hazards, selective limb removal, debris cleanup, and hauling as outlined in the approved scope of work. Pricing is based on tree size, limb location, accessibility, equipment requirements, and job complexity. Formal arborist assessments and certifications are not included.

21. Recurring Property Maintenance Services

Scheduled property maintenance services designed to maintain clean, safe, and attractive outdoor spaces. Services may include lawn mowing, edging, weed trimming, brush removal, seasonal cleanup, leaf removal, and general grounds maintenance. Service frequency may be weekly, biweekly, monthly, or customized according to customer requirements. Pricing is based on property size, service frequency, labor, equipment requirements, and scope of work.

22. Commercial Property Maintenance

Professional commercial grounds and property maintenance services for businesses, office facilities, rental properties, and managed commercial sites. Services may include lawn mowing, edging, weed trimming, brush removal, tree maintenance, seasonal cleanup, debris hauling, and general exterior grounds maintenance. Services may be provided on a scheduled or as-needed basis. Pricing is based on property size, service frequency, labor, equipment requirements, and approved scope of work.

23. Residential Property Maintenance

Professional residential property maintenance services designed to keep homes, yards, and outdoor spaces clean, attractive, and well-maintained. Services may include lawn mowing, edging, weed trimming, tree trimming, brush removal, seasonal yard cleanup, leaf removal, debris hauling, and general exterior property maintenance. Services are customized based on property size, customer needs, service frequency, labor, equipment requirements, and approved scope of work.

24. Storm Debris Removal & Cleanup

Removal and cleanup of storm-related debris from residential and commercial properties. Services may include collecting, cutting, loading, hauling, and disposal of fallen branches, tree limbs, brush, and other storm-generated vegetation. Cleanup services are customized according to property conditions, debris volume, accessibility, equipment requirements, and approved project scope. Hazardous conditions and emergency response requirements may affect pricing.

25. Wood Cutting & Log Removal

Professional wood cutting and log removal services for residential and commercial properties. Services may include cutting fallen trees and existing logs into manageable sections, loading, hauling, and removal of unwanted wood material. Services are customized according to log size, quantity, accessibility, equipment requirements, transportation, and approved project scope.

26. Firewood Cutting & Processing

Firewood preparation services, including cutting eligible logs into customer-requested lengths, processing, stacking, and handling of wood material. Services are customized based on wood quantity, log size, cutting requirements, accessibility, labor, and equipment needs. Firewood sales and delivery are subject to availability and separate pricing.

27. Wood Chipping & Brush Reduction

Professional wood chipping and brush reduction services for residential, commercial, and undeveloped properties. Services include processing eligible tree limbs, branches, brush, and small wood material into wood chips using appropriate equipment. Wood chips may be left on-site for customer use or hauled away as specified in the approved project scope. Pricing is based on material volume, equipment requirements, site accessibility, labor, and hauling needs.

28. Land Restoration & Final Site Cleanup

Post-project property cleanup and restoration services following tree removal, land clearing, brush removal, and other outdoor projects. Services may include removal of remaining vegetation, collection of loose debris, final site cleanup, grading of disturbed areas where appropriate, and preparation of the work area for future landscaping or property use. Pricing is based on site conditions, property size, labor, equipment requirements, and approved project scope.

29. Drainage Ditch & Vegetation Clearing

Vegetation management and clearing services for drainage ditches, swales, and designated water-flow areas on residential and commercial properties. Services may include removal of overgrown grass, weeds, brush, small vegetation, and accumulated organic debris to improve access and maintain drainage pathways. Pricing is based on area size, vegetation density, accessibility, labor, equipment requirements, and approved project scope. Excavation and drainage-system repairs are not included unless separately agreed upon.

30. Property Cleanup & Outdoor Debris Removal

General outdoor property cleanup services for residential and commercial properties. Services may include removal of unwanted outdoor debris, discarded yard materials, branches, brush, leaves, and other approved non-hazardous materials. Services include collection, loading, hauling, and disposal at appropriate facilities. Pricing is based on material volume, labor, transportation distance, disposal fees, accessibility, and approved project scope. Hazardous materials and regulated waste are excluded.

31. Tree Planting & Replacement

Tree planting and replacement services for residential and commercial properties. Services may include site preparation, removal of designated planting-area debris, planting of customer-selected trees, soil preparation, installation, and cleanup. Pricing is based on tree species, size, quantity, site conditions, materials, labor, and equipment requirements. Tree purchases, delivery, and ongoing maintenance are quoted separately unless included in the approved project scope.

32. Soil Preparation & Landscape Grading

Professional soil preparation and landscape grading services for residential and commercial properties. Services may include surface leveling, removal of loose vegetation and debris, soil preparation, minor grading, and preparation of designated areas for landscaping, lawn installation, or future property improvements. Pricing is based on project size, soil conditions, terrain, equipment requirements, labor, and approved scope of work. Drainage engineering and major excavation are excluded unless separately contracted.

33. Fence & Property Boundary Line Clearing

Professional fence line and property boundary clearing services, including removal of overgrown brush, vines, weeds, small trees, and unwanted vegetation along designated property lines and fence corridors. Services may include cutting, trimming, debris collection, hauling, and cleanup to improve property access, visibility, and appearance. Pricing is based on linear footage, vegetation density, terrain, accessibility, labor, and equipment requirements.

34. Vacant Lot Maintenance & Vegetation Control

Professional vacant lot maintenance services for residential, commercial, and undeveloped properties. Services may include grass and weed cutting, brush removal, vegetation control, small tree removal, seasonal cleanup, debris collection, and general grounds maintenance. Services may be provided on a one-time or recurring basis. Pricing is based on lot size, vegetation density, terrain, accessibility, labor, equipment requirements, and approved project scope.

35. Commercial Lot Clearing & Grounds Maintenance

Commercial lot clearing and grounds maintenance services for businesses, property managers, commercial facilities, and investment properties. Services may include grass and brush cutting, vegetation removal, small tree removal, land clearing, debris collection, hauling, seasonal cleanup, and ongoing grounds maintenance. Services are customized according to property size, vegetation conditions, equipment requirements, service frequency, and approved project scope.

36. Right-of-Way & Easement Clearing

Vegetation and brush clearing services for designated right-of-way areas, access corridors, and property easements. Services may include removal of overgrown brush, weeds, small trees, and unwanted vegetation to improve access, visibility, and property maintenance. Work is performed only within authorized areas and with applicable property-owner or utility permissions. Pricing is based on project length, vegetation density, terrain, accessibility, labor, and equipment requirements.

37. Post-Construction & Property Site Cleanup

Professional post-construction and property site cleanup services for residential and commercial projects. Services may include removal of approved vegetation, brush, branches, wood debris, and general outdoor construction-related debris. Additional services may include loading, hauling, disposal, and final exterior grounds cleanup to prepare the property for its intended use. Pricing is based on site conditions, debris volume, labor, equipment requirements, transportation, and approved project scope. Hazardous materials and regulated construction waste are excluded.

38. Seasonal Tree & Shrub Maintenance

Seasonal tree and shrub maintenance services for residential and commercial properties. Services may include selective pruning, removal of dead or damaged branches, shrub trimming, removal of overgrown vegetation, seasonal cleanup, and collection of yard debris. Services are customized according to plant conditions, property size, accessibility, labor, equipment requirements, and approved project scope. Specialized arborist services and treatments are quoted separately.

39. Gutter & Roofline Debris Cleanup

Exterior gutter and roofline debris cleanup services for residential and commercial properties. Services may include removal of accumulated leaves, small branches, and other organic debris from accessible gutters and designated roofline areas. Work is subject to safe access, appropriate fall-protection equipment, roof conditions, and site assessment. Pricing is based on building height, property size, accessibility, debris volume, and labor requirements. Roof repairs and gutter installation are excluded.

40. Seasonal Storm Preparation & Property Debris Clearing

Property preparation and vegetation cleanup services designed to help residential and commercial property owners prepare for seasonal storms and severe weather. Services may include removal of loose branches, dead or damaged limbs, overgrown brush, accumulated yard debris, and unwanted vegetation. Additional services may include hauling and disposal of approved materials. Pricing is based on property size, vegetation conditions, labor, equipment requirements, accessibility, and approved project scope. Tree risk assessments and emergency response services are quoted separately.
